### Rubber polish for rubber boots

With Rapide Rubber Polish it is easy to maintain nature rubber boots. The polish takes care of the rubber, prevents drying out and protects. Rubber polish is an emulsion on the base of water and silicones to extend the lifetime of the boots. Natural rubber is a natural product which needs maintenance just like leather. When nature rubber dries out, the rubber will crack which decreases the lifetime and they will start to leak.

#### Size guide Clothes

We have adjusted our size guide for the coming fall of 2018. Previous styles can be experienced as small in

The measurements should be taken directly on the body. If your measurements are between two sizes we recomend you to go for the larger size if you prefer a generous fit and for the smaller size if you like a slimmer fit.

- A) Chest width, measured where the bust is the largest.
  B) Waist width, measured where the waist is smallest.
  C) Seat width, measured where you are widest.
  D) Arm length from shoulder to wrist.
  E) The length of the inside seam of the breeches from crotch to ankle.

#### Adjustment

The body protector should be as tight to the body as possible. Fasten the protector and adjust the fit, using the Velcro straps on each side. The panels should be so tight that there is no air between the front and back of the protector.

The lower edge of the front part should be at least 25 cm below the end of the chest. The upper edge of the front should reach the upper edge of the sternum. The body protector should not touch or cover any part of the throat.

If the body protector doesn't fit, despite the instructions being followed, another size should be tested.

Approved according to: DIN EN 13158:2018 Level 3
